

TOWN & COUNTRY FIREPLACES™

TC36 Gen2

The Original
DECORATIVE DIRECT VENT TECHNOLOGY® (DDV®)

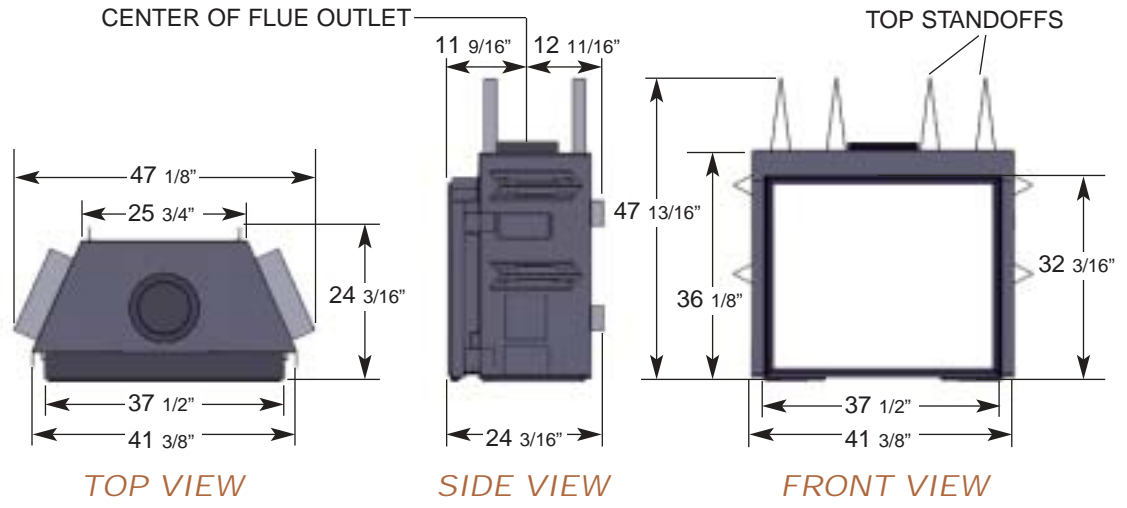

TC36 Gen2

A Town & Country Fireplace gives you the most realistic look of a wood burning hearth available today.

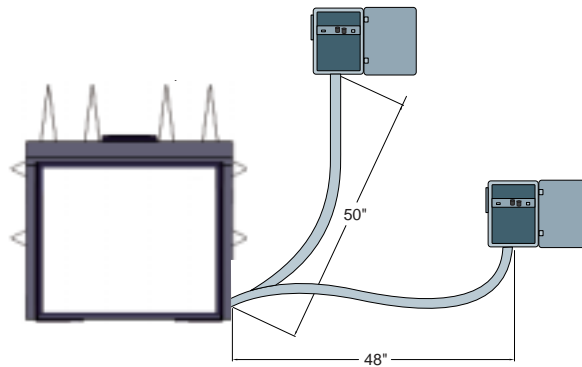

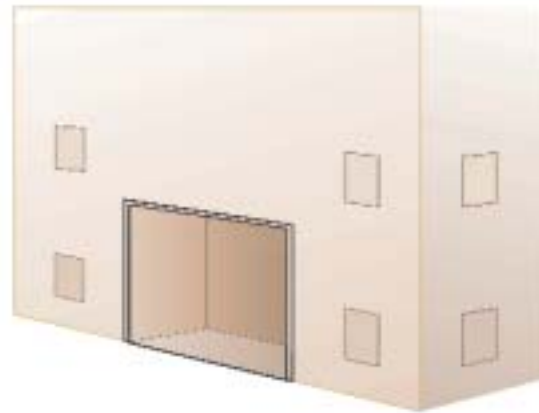

The Town & Country TC36 offers unprecedented flexibility in installation and design options. For the first time we invite you to come inside the fireplace to design your hearth from the inside out. You have complete control over the look of your fireplace, with a variety of firebox liners and accessories to choose from, a clean view of the fire unobstructed by louvers, a flush hearth design, and "disappearing" ceramic glass.

Town & Country Fireplaces has redefined gas fireplace design with its patented Decorative Direct Vent technology®, creating the first gas fireplace with flames so real you almost hear them crackle.
